Simply maximizing your IT potential since 1995.

Who We Are

Dynamix is a leading IT solutions provider with more than 20 locations throughout the Southeast. We offer a full range of products and services including top-of-the-line hardware, software and maintenance. With decades of combined experience and deep knowledge of IBM and Cisco products, our award-winning team will craft a solution that meets your needs. Through excellent client and technology partner relationships, we deliver optimized IT infrastructures that allow our customers to run their businesses more efficiently.

What We Deliver

Expertise: Our experienced team anticipates customer needs to formulate a total solution.

Simplicity: We aim to do more with less, simplifying IT environments that cut costs.

Reliability: We take our commitments seriously by being responsive and accountable.

Longevity: We are committed to cultivating professional relationships that last.

The Dynamix Difference

Our goal is not just to win your business, but to keep you as a lifelong customer. We value our customer relationships and approach problems with practical, long-term solutions. Our holistic approach aligns your immediate needs with your strategic vision while staying within your project budget.

Our Solutions

Data Center Infrastructure: We evaluate your current infrastructure, pinpoint the problem areas and recommend upgrades to better leverage your server, storage and network capabilities. Over time, you will experience an increase in data productivity while watching your hardware-related expenses dramatically drop.

Storage Management: We approach storage management proactively by evaluating your existing data and current storage system to project your future needs. From structuring databases to compiling unstructured data, we can compress it all down to a manageable size and recommend server upgrades that give your data room to grow.

Networking: Even with the right storage and servers in place, you need an efficient network that can effectively communicate between the two. We implement networks that power your databases, optimize applications and activate system wide changes faster.

Data Protection: Effective disaster recovery starts with a solid contingency plan that allows us to quickly recover the data you need to get your businesses back to work.

Software: Our software solutions tackle complex challenges, provide quantifiable business value and help companies be smarter about their IT.

Security: From people and data to applications and infrastructure, our comprehensive approach ensures core protection.

Maintenance Coverage: Offerings that allow IBM and Cisco customers get simplified coverage that drives down costs.

Industry Support: Our expertise includes healthcare, retail, manufacturing as well as a variety of other industries.

Contingent Workforce Solutions: We provide qualified and reliable workforce solutions that align with your business goals.
